SUMMARY

B.Tech Computer Science and Engineering student with hands-on experience in Python, Data Science, and Machine Learning through academic and personal projects. Experienced in data preprocessing, EDA, machine learning model development, and application development. Currently building practical skills in AI and data-driven problem solving through projects and research experience.

EDUCATION

Guru Tegh Bahadur Institute of Technology 2025 – 2029

Bachelor of Technology in Computer Science and Engineering New Delhi, India

TECHNICAL SKILLS

Data Analysis: Excel, SQL, Pandas, NumPy

Programming & Databases: Python, C, C++, MySQL

Web Development: HTML, CSS, JavaScript

Visualization: Matplotlib, Seaborn

Machine Learning: Scikit-learn, XGBoost, TensorFlow, PyTorch

Tools: Jupyter, Google Colab, Git, VS Code

Concepts: Data Cleaning, Data Preprocessing, EDA

PROJECTS

Women Safety AI App

- Developed the concept for an AI-powered women safety application featuring SOS alerts, fake call triggering, live location sharing, smart risk prediction using route analysis, and wearable integration.
- Secured 1st place in a college ideathon for the project.

USA House Price Prediction | [Python](#) | [Pandas](#) | [NumPy](#) | [Scikit-learn](#)

- Built a USA House Price Prediction model using Python, Pandas, NumPy, and Scikit-learn.
- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering on housing data.
- Trained and evaluated regression models using R² Score, MAE, and RMSE.

Expense Tracker | [Python](#) | [Streamlit](#)

- Developed an interactive Expense Tracker using Streamlit to record and manage daily expenses.
- Implemented budget monitoring, category-wise expense analysis, and monthly expense summaries.
- Utilized Streamlit Session State to manage application data dynamically and provide a seamless user experience.

EXPERIENCE

InAmigos 2026

Research Intern

- Conducted research on emerging AI trends and their development across different industries and domains.
- Researched and analyzed the impact of AI advancements on jobs, skills, and the future of work.
- Collected information from reliable sources and synthesized findings into structured research content.
- Presented research findings in a clear and organized format while evaluating and comparing information from multiple sources.
